

J. Ángel Cívico Martos

Full Stack / Frontend Developer with over **5 years of experience** in designing and implementing robust, scalable, and user-centered web applications. My background in Video Game Design provides me with a solid logical foundation, strong analytical skills, and a keen eye for user experience (**UX/UI**). I have extensive experience working within Open Source systems and modern development with **React, Angular, and TypeScript**. Proficient in both complex modular architectures and the migration and optimization of SaaS platforms, I stand out for my problem-solving mindset, continuous technical curiosity, and commitment to development best practices to transform complex ideas into fluid and intuitive interfaces.

Adaptability

Education

Videogames Design and Development Degree

URJC / Móstoles, Madrid / 2015 - 2019

Bootcamp Frontend Developer

Minsait by Indra / Alcobendas, Madrid / Nov. de 2019

Experience

Full Stack Developer

OpenNebula - Madrid
Nov. 2024 - Apr. 2025

- Contributed to an **open-source cloud computing project**, specifically enhancing the Sunstone GUI using **React**.
- Fixed **community-reported frontend bugs**, troubleshooting component rendering and data flow issues.
- Collaborated on documentation** for new software versions to ensure clear communication of updates to end-users.
- Successfully completed **internal training** covering CLI, system architecture, and open-source development standards.

Frontend Developer

Delectatech - Barcelona
Dic. 2020 - Apr. 2024

- Began as a **UI/UX Designer**, spearheading **Figma prototyping** and the creation of design systems and reusable components.
- Pivoted to **Frontend Development** to deepen technical expertise, bridging the gap between high-fidelity design and robust implementation.
- Designed and implemented graphical interfaces for the FoodRadar SaaS web application using **Figma, Symfony (Twig), Sass, and TypeScript**.
- Actively collaborated on the **migration of the main project from Symfony to Angular**, focusing on high-traffic modules to improve maintainability.
- When frameworks could not be used, I developed **modular architectures in TypeScript**, ensuring scalability and facilitating unit testing.

Hobbies

Aerial sports

Sci-fi

Frontend Developer

Minsait by Indra - Alcobendas, Madrid

Nov. **2019** - Nov. **2020**

- Following an internal bootcamp, I joined a development team using **SharePoint Framework (SPFx)** with React to extend the **SharePoint user interface**.
- I was responsible for building an **Angular project from scratch**, including initial configuration, code architecture, and component implementation.
- I worked with **TypeScript, Sass, and npm** to develop modular and maintainable solutions.

Maquetador web (prácticas universitarias)

Nestrategia - Fuenlabrada, Madrid

Feb. **2019** - May. **2019**

- Managed and created websites for clients using **WordPress as a CMS**.
- Edited photographs with **Photoshop** and designed iconography with **Illustrator** for website integration.
- Used **Mailchimp** to create and distribute newsletters.
